# APTUM MANAGED DISASTER RECOVERY AS A SERVICE (DRAAS)

In today's always-on world applications and data are expected to be available 24/7. Downtime is not an option. Robust disaster recovery is a fundamental cornerstone of business assurance and continuity. Implemented correctly it provides the peace of mind your business will function and your data is protected should an incident occur.
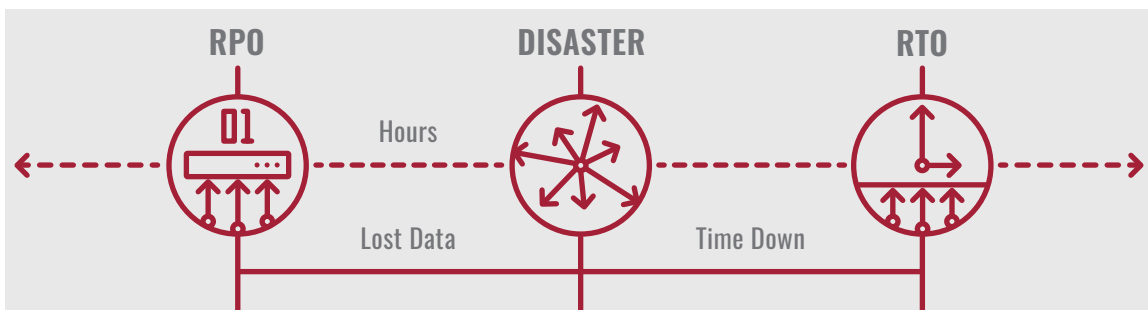

## Turnkey Disaster Recovery to ensure your business and data is protected

Aptum Managed Disaster Recovery as a Service (DRaaS) leverages the cloud to protect your data and allow for the on-demand ordering and powering up of Virtual Machines in the event of a failover.

Your data will be replicated to the cloud which provides rapid, efficient failover of your production environment should you need it. The result is total peace of mind and the knowledge that you can focus on your strategic priorities, confident your business is protected.

Aptum Managed DRaaS offers flexibility to meet your specific business recover objectives: you can request file level restore (depending on your service level) and partial or full failover of your systems, which includes assistance with configuration and troubleshooting.

In addition, Aptum Managed DRaaS uses an enterprise grade replication software that is suitable for all application types and minimizes your Recovery Point and Recovery Time Objectives (RPO and RTO), so data loss is negligible and downtime is all but eliminated.

| RPO | DISASTER | RTO |
|-----|----------|-----|
| 01 | | |
| Hours | | |
| Lost Data | Time Down | |

Accelerate digital transformation and innovation and seamlessly adapt to change while protecting your business and customers from disruptions.

# SERVICE OVERVIEW

## Custom DR solutions that minimize business impact and ensure service levels are maintained

- Architecture of a best-fit DR solution aligned to your business recovery requirements

- Creation of a custom DR runbook specific to your IT environment

- Assurance through you're protected with non-disruptive DR testing to verify runbook accuracy and solution performance

- DR is based on asynchronous replication to minimize data loss

- Recovery Point Objective (RPO) is measured in seconds minimizing service interruption

- 24/7 support is available by phone and the online ticket system – Aptum teams are ready to trigger a failover at all times
